

Sample Training Outline for Blood borne pathogens and Hep B

Objectives:

1. Explain how Hep B and HIV transmitted
2. Look at tasks performed in child care that can result in exposure
3. Define Universal Precautions
4. Show personal protective devices (ex-gloves) that serve as barriers to infectious fluids
5. Describe labeling contaminated waste and laundry procedures.
6. Understand HEP B vaccine information

Statement of Declination

I understand that due to my occupational exposure to blood or other potentially infectious materials, I may be at risk of acquiring hepatitis B virus (HBV) infection. I have been given the opportunity to be vaccinated with Hepatitis B vaccine, at no charge to myself. However, I decline Hepatitis B vaccination at this time.

I understand that by declining this vaccine I continue to be at risk of acquiring hepatitis B, a serious disease. If in the future I continue to have occupational exposure to blood and other potentially infectious materials and want to be vaccinated with hepatitis B vaccine, I can receive the vaccination series at no charge to me.

I have received training regarding hepatitis B, hepatitis vaccination and the method and benefits of vaccination.
